Re: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109
IBSF File No. SAT-MOD-20101118-00239

Ms. Dortch,

I am a Registered Land Surveyor and small business owner in southern Indiana. I am extremely alarmed by the request of LightSquared to impinge upon the low energy GPS signals I use for my business. GPS has become the de facto standard by which the majority of land surveyors base their business. Any interference of this GPS data stream will cripple our businesses. In addition to the damage incurred by our businesses, many of our clients will suffer as well. They likewise have become accustomed to a certain standard of accuracy, productivity, and cost effectiveness that GPS provides. Allowing LightSquared to proceed with their request will destroy this business model.

Please deny the request by LightSquared (which ignores the recent independent test results) to affirm its license and its request to go forward with its plan.

Thank you for time and consideration.

A handwritten signature in black ink, appearing to read "Jess A. Gwinn". The signature is fluid and cursive, with the first name "Jess" being the most prominent part.
